Horror Story Website Project Report

Team Members

1. Sana – Founder & Project Lead
2. Layeeqa – Assistant Project Coordinator & Audience Engagement
3. Tasneem – Assistant Project Coordinator & Layout Designer
4. Zainab – Background Designer & Assistant
5. Afnaan – Background Designer & Assistant

Title

The Horror Story – Interactive Storytelling Website

Objective

To design an engaging horror storytelling website that delivers suspenseful content through creative visuals and narrative flow using no-code tools.

Tools Used

1. ChatGPT
2. Canva

Methodology

The project followed a concept-first approach. Story ideas were generated and refined using AI assistance. Canva was used to design the website layout, backgrounds, and visuals. Team collaboration ensured content quality, audience engagement, and visual consistency.

Output

A fully functional horror storytelling website featuring themed backgrounds, engaging narratives, and a clean visual layout.

Result

The website successfully captures user attention and provides an immersive storytelling experience using simple yet effective design techniques.

Conclusion

This project demonstrates how no-code tools and AI can be effectively combined to create creative digital experiences. Team collaboration played a key role in achieving the final output.
